YouTube

Often claimed citations like "inventories hide faults" suggest to avoid any inventory in a supply chain. This way of thinking is attributed to the Just-In-Time-philosophy, which aligns the processes in the supply chain such that almost no inventories are necessary. This is only possible in some specific industries or certain sections of a supply chain and for selected items.

In all other cases inventories are necessary and therefore need to be managed in an efficient way. Inventories in supply chains are always the result of inflow and outflow processes (transport, production etc.). This means that the isolated minimization of inventories is not a reasonable objective of SCM, instead they have to be managed together with the corresponding supply chain processes.

1) Inventory analysis
2) Transportation
Lot-Sizing Stock
3) Seasonal Stock
or Pre-Build Stock
and WIP
4) Safety Stock

23.01.12.00 Pedagogium: Logistic - IT logistics systems
Change unit
0 of 169 lessons

In all other cases inventories are necessary and therefore need to be managed in an efficient way. Inventories in supply chains are always the result of inflow and outflow processes (transport, production etc.). This means that the isolated minimization of inventories is not a reasonable objective of SCM, instead they have to be managed together with the corresponding supply chain processes.

Inventories cause costs (holding costs), but also provide benefits, in particular reduction of costs of the inflow and/or outflow processes. Thus, the problem is to find the right trade-off between the costs for holding inventories and the benefits.

Table 2.4 Stock components, determinants, and benefits

Stock component	Determinants	Benefits
Production lot-sizing stock	Setup frequency	Reduced setup time and costs
Transportation lot-sizing stock	Shipment quantity	Reduced transportation costs
Inventory in transit	Transportation time	Reduced transportation costs
Seasonal stock	Demand peaks, tight capacity	Reduced costs for overtime and for investments

1) Inventory analysis
2) Transportation
Lot-Sizing Stock
3) Seasonal Stock
or Pre-Build Stock
and WIP
4) Safety Stock
Memo!

As this is an online broadcast, please make sure you are online

Often claimed citations like "inventories hide faults" suggest to avoid any inventory in a supply chain. This way of thinking is attributed to the Just-in-Time-philosophy, which aligns the processes in the supply chain such that almost no inventories are necessary. This is only possible in some specific industries or certain sections of a supply chain and for selected items.

In all other cases inventories are necessary and therefore need to be managed in an efficient way. Inventories in supply chains are always the result of inflow and outflow processes (transport, production etc.). This means that the isolated minimization of inventories is not a reasonable objective of SCM, instead they have to be managed together with the corresponding supply chain processes.

Inventories cause costs (holding costs), but also

1) Inventory analysis
 2) Transportation Lot-Sizing Stock
 3) Seasonal Stock or Pre-Built Stock and WIP
 4) Safety Stock

Memo!

The button "live" should always be red. Check it throughout the lesson

Inventories cause costs (holding costs), but also provide benefits, in particular reduction of costs of the inflow and/or outflow processes. Thus, the problem is to find the right trade-off between the costs for holding inventories and the benefits.

Stock component	Determinants	Benefits
Production lot-sizing	Setup frequency	Reduced setup time and costs
Transportation lot-sizing	Shipment quantity	Reduced transportation costs
Inventory in transit	Transportation time	Reduced transportation costs
Seasonal stock	Demand peaks, tight capacity	Reduced costs for overtime and for investments
Work-in-process	Lead time, production planning and control	Increased utilization, reduced investments in additional capacity
Safety stock	Demand and lead time uncertainty, process uncertainties	Increased service level, reduced costs for emergency shipments and lost sales

1) Inventory analysis
 2) Transportation Lot-Sizing Stock
 3) Seasonal Stock or Pre-Built Stock and WIP
 4) Safety Stock

Start typing...

To see the list of all classes, select the course you want and click **To Class**

My classes

The screenshot displays two course cards under the heading "My classes".

- PEDAGOGIUM Logistics**
 - Online courses
 - 0% Completed (0 of 169)
 - Button: → To class
- PEDAGOGIUM Preparation Course**
 - Online courses
 - 0% Completed (0 of 152)
 - Button: → To class

Red circles highlight the "To class" buttons on both cards, and red arrows point from a central point between the cards to each of these buttons.

Here you can find information on each lesson and topic and recordings of the lessons:

LOGISTICS	Supply Chain Management: L1. SCM. An Overview	→ Open the lesson
LOGISTICS	Supply Chain Management: L2. Origins	→ Open the lesson
LOGISTICS	Supply Chain Management: L3. Supply Chain Analysis	→ Open the lesson
LOGISTICS	Supply Chain Management: L4. Performance Measurement	→ Open the lesson
LOGISTICS	Supply Chain Management: L5. Inventory Analysis	→ Open the lesson
LOGISTICS	Supply Chain Management: L6. Types of Supply Chains Part 1	→ Open the lesson
LOGISTICS	Supply Chain Management: L7. Types of Supply Chains Part 2	→ Open the lesson

The screenshot shows a web application interface for a Logistics course. The main content area displays a video player with a YouTube video titled "WHAT IS SUPPLY CHAIN MANAGEMENT ? 5 MINUTES EXP...". The video player has a play button and a "Подписаться" (Subscribe) button. Below the video player, the text "Supply Chain Management" is displayed, followed by a progress indicator "1".

The sidebar on the right contains a "Sections" menu with the following items:

- Lesson recording
- Channel Research
- Collaboration and Coordination
- Bullwhip Effect in Production-Distribution Systems
- Hierarchical Production Planning
- Homework
- Complete lesson

The top of the interface shows "AP" and "Change unit" with a progress indicator "Completed 0% 0 of 169 lessons". The bottom of the interface shows "LOGISTICS" on both sides.

You can add words to the vocabulary and learn them. In the dictionary, you can click "Learn words" and study the words in the form of a game.

 Add all words

  Cześć!
Hello!

  Siema!
Hello!

  Dzień dobry!
Good afternoon!

  Dobry wieczór!
Good evening!

  Do widzenia!
Good bye!

  Cześć!
Bye

Vocabulary

Add a new word 

 świnka morska
guinea pig

 pies
dog

 chomik
a hamster

 kot
cat

All words **Learn words**

  pies
dog

The last section in the lesson is Homework.

AP. Change unit Completed 0% 0 of 169 lessons

Homework

1.1 Proszę przeczytać dialog i zaznaczyć zdania prawdziwe (P) i fałszywe (F).

Sekretarka: Jak się pan nazywa?
Atif: Atif Rasheed.
Sekretarka: Skąd pan jest?
Atif: Jestem z Turcji.
Sekretarka: Gdzie pan mieszka?
Atif: Przepraszam, nie rozumiem. Proszę powtórzyć.
Sekretarka: Czy mieszka pan w Łodzi?
Atif: Przepraszam, źle mówię po polsku. Proszę mówić wolniej.
Sekretarka: Gdzie pan mieszka? Jaki ma pan adres w Łodzi?
Atif: Aha, rozumiem. Mieszkam w domu studenta, ulica Rzgowska.

1/6 Sekretarka nazywa się Rasheed.

2/6 Pani Atif jest z Polski

3/6
